

Oil and Gas Regulatory Seminar August 16, 2016 • Corpus Christi, Texas

Sessions and Descriptions

Impact of Recent Statewide Rule Amendments on Drilling Permit Application Process (Garza)

This session explains recent rule amendments to Statewide Rules 5, 38, 40 and 86 and their effect on the drilling permit application process.

Completions: Overview and Discussion (Stasulli)

This session explains how to file a completion online, including specific areas that may delay your application from being processed timely. This session will also go over how, when and what to file regarding online applications.

Website Queries for Proration: How to Stay in Compliance (Stasulli)

This session focuses on how to stay in compliance and obtain information concerning individual wells, leases, fields and operators.

Production Reporting (Davis)

This session discusses the filing of the Form PR, *Monthly Production Report*, to comply with Statewide Rules 27, 54 and 58(b). In addition, the various filing options will be discussed, as well as discrepancy letters from the Railroad Commission of Texas.

Pipeline Permitting (Form T-4) (Waterman/Evans)

This session explains the pipeline online permitting system, *Form T-4 – Application for Permit to Operate a Pipeline in Texas*, processes required of producers, gatherers and transmission line operators. Topics to be covered include what is needed to process Form T-4's online and an overview of the corresponding mapping requirements.

Pipeline Accident/Incident Reporting (Kelly)

This session explains the Railroad Commission of Texas' pipeline safety state reporting requirements for gas and hazardous liquids pipelines. Topics to be covered include an overview of the Railroad Commission of Texas's pipeline safety regulatory functions, types of pipelines, and criteria for reporting pipeline incidents and accidents to the Railroad Commission of Texas.

Statewide Rule 36: H2S (Baer)

This session is an overview of the requirements of Statewide Rule 36 in regards to the specifics of Hydrogen Sulfide, safety training and compliance for industry personnel associated with oil and gas operations in the State of Texas. Topics include requirements for workover, drilling and supervisory personnel.

Statewide Rule 13: Surface Casing Exceptions (Thompson)

This session addresses the application processes and procedures for requesting a Statewide Rule 13 exception. It includes an overview of the casing, cementing, drilling, well control and completion requirements provided in Statewide Rule 13.

Statewide Rule 15: Inactive Well Requirements (Dashier)

This session discusses Inactive Well Plugging Extensions under Statewide Rule 15 (also known as House Bills 2259 and 3134) focusing on surface cleanup requirements and Form W-3C, *Certification of Surface Equipment Removal for an Inactive Well*. This session also focuses on Plugging Extension Application requirements and Form W-3X. This session will also discuss acquisitions, mergers and bankruptcy impact on the P-5 renewal.

Oil and Gas Division Discussion Panel

This discussion panel is an open forum that will provide conference participants the opportunity to ask questions and discuss subjects related to the forms and filing procedures associated with the Railroad Commission of Texas departments.
